Assignment 6:

You are tasked with creating a modern and visually appealing online event registration form for an upcoming tech conference using Bootstrap 4. The form should include tables to display session information, utilize color schemes for branding, and incorporate various form components for user input. Your goal is to ensure a seamless user experience and an attractive design that aligns with the event's theme.

Tasks to Accomplish:

1.   Header and Introduction:
Begin with a header showcasing the event logo and a brief introduction. Use the event's color scheme to make it visually appealing.

2.   Sessions Table:
Create a table to display the conference sessions' schedule. Include columns for session name, speaker, date, and time. Use Bootstrap's table styling to enhance readability and make it responsive.

3.   Registration Form:
Design a user registration form that collects the attendee's name, email, organization, and preferred sessions. Apply Bootstrap's form components like text inputs, email inputs, and dropdowns. Use appropriate validation for required fields.

4.   Color Scheme:
Apply the event's color scheme throughout the form, ensuring consistent use of colors for buttons, headings, and links.

5.   Submit Button:
Style the form's submit button with Bootstrap's button classes. Upon submission, display a success message or a confirmation modal.

6.   Footer:
Create a footer that includes event details, contact information, and links to social media profiles. Use Bootstrap's grid system for layout.

7.   Responsive Design:
Ensure that the form is responsive and looks great on different devices, including desktops, tablets, and smartphones.

8.   Optional Enhancement - Modals:
Implement Bootstrap modals to provide additional information about specific sessions when a user clicks on the session name in the table. Include session details, speaker bio, and a "Register" button within the modal.

Remember to consult Bootstrap 4's documentation for guidance on using its components, classes, and responsive features. Your solution should effectively combine Bootstrap features to create an elegant and user-friendly online event registration form for the tech conference.
